IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

-5 JAN 1910

Brighton Corporation Waterworks
Kept at Lewes Road.
in the County of Sussex
by James Winslow

Rain Gauge
Pattern
Diameter of top 8 in.
Height of top above Ground 3 ft. 6 in.
" " " Sea Level 88·00 ft.

Time of Observation 9 am

Nearest Railway Station
Name Lewes Road
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

·7 JAN 1910

Kept at Little Dene Lewes
in the County of Sussex
by The Hon C Brand

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 58·37 ft.

Time of Observation 9. a. m daily

Nearest Railway Station
Name Glynde L.B & S C Railway
Distance 1 mile Direction S b S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
12 JAN 1911

Kept at Dorset House, Littlehampton

in the County of Sussex 2

by G H Beechens

Rain Gauge:
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 2 ft. in.
" " " Sea Level 30 ft.

Time of Observation 9 a.m

Nearest Railway Station: Name Littlehampton
Distance 1 mile Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Kept at The Hall Nutley

in the County of Sussex

by Miss Cook's gardener, C Sayer

RAIN GAUGE
Pattern Negretti Zambra
Diameter of top 5 in.
Height of top above Ground – ft. 10 in.
" " " Sea Level 417 ft.

Time of Observation 9

Nearest Railway Station
Name Sheffield Park
Distance 4 Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

in the County of Sussex

by Mr. Joad

2

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 10½ in.
" " " Sea Level 130 ft.

Time of Observation 9 am

Nearest Railway Station
Name Goring
Distance 3 Direction S. E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Rain fell, in 1902, on 147 days.

S.a.

Please note that "Ringmer" should not be placed under the heading of "Lewes" – The village is divided from the County town by about three miles of open country – and the level of Ringmer is considerably higher than that of a large part of Lewes – It is only the Western side of that town which stands on high ground.

METEOROLOGICAL OBSERVATIONS

At "Downlands," Ringmer, during Dec., 1906.

Barometer (at 9 a.m.).

Highest . . . 30·50 inches, on the 20th and 21st.
Lowest . . . 28·95 inches, on the 26th.
Mean height . 29·90 inches.

Thermometer.

Highest temperature in the shade, 55°, on the 3rd.
Lowest temperature in the shade, 23°, on the 24th.
Mean maximum temp. for the month, in the shade, 42°·35.
Mean minimum temperature for the month, 33°·54.
Mean temperature for the month, at 9 a.m., 36°·38 (or 4°·55 *lower* than in the corresponding month of last year).

Hygrometer (Mason's).

Mean difference between Wet and Dry Bulbs, at 9 a.m., 1°·40.

Note.—The thermometers are out-doors; facing North; 4-ft. above ground; in double-louvred screen.

Rain-Gauge (Symons's).

Total fall (including melted snow) during the month, 2·46 inches; equivalent to 248·46 tons; or 55,652·58 gallons of water per acre; or 12·30-lbs. to a square foot.

Rain to the amount of ·01 inch, or more, fell on 14 days.

Greatest fall in 24 hours, 0·53 inch, on the 30th.

Rain has fallen on 162 days, from 1st Jan. to 31st Dec.; total amount 34·24 inches.

The rainfall at Ringmer in Dec. was 1·36 inch *more* than in the same month of last year.

The rainfall for the month was 0·69 inch *more* than the average at Greenwich during the 50 years, 1841-90; while the total for the entire year was 9·71 inches *more* than the average annual fall at Greenwich during the same period of 50 years.

General Remarks.

W. and N.W. winds prevailed; calm on the whole. A rapid fall in the barometer, from 29·80 to 28·95 inches, on the 25th, was followed by a snowstorm during the night; and snow also fell during the nights of the 26th and 27th. A colder month than December, 1905.

Summary of Meteorological Observations

At Ringmer, during the year 1906.

Barometer (at 9 a.m.).

Highest, during the year, 30·55 inches, on the 27th Sept.
Lowest, " " 28·95 " " 26th Dec.
Mean height, " 29·95 inches.

Thermometer

(In double-louvred screen, 4-ft. above ground).

Mean temperature, during the year, at 9 a.m., 51°·05.
Highest temperature, in the shade, 91°, on the 2nd Sept.
Mean maximum temperature, in the shade, during the year, 58°·21 (or, 7°·16 *higher* than the mean temperature at 9 a.m.).
Lowest temperature in screen, 4-ft. above ground, 23°, on the 24th December.
Mean minimum temperature, during the year, 44°·14.
Hottest months, July and Aug. The mean temperature of July, at 9 a.m., was 65°·96; and the mean maximum 72°·96. The mean temperature of August, at 9 a.m., was 65°·74; and the mean maximum 73·58.
Coldest month, December. Mean temperature, at 9 a.m., 36·38; mean minimum temperature, 33°·54.

Hygrometer (Mason's).

Mean difference between readings of Wet and Dry Bulbs, during the year, at 9 a.m., 2°·44.

Rainfall in 1906.

January	5·49	inches, on	20	days.
February	3·15	"	19	"
March	1·66	"	19	"
April	1·26	"	8	"
May	2·53	"	12	"
June	1·95	"	6	"
July	0·78	"	9	"

October	5·11	"	17	"
November	6·79	"	19	"
December	2·46	"	14	"
Total	34·24 ✓	"	162	" ✓

The above total of 34·24 inches is equivalent to 33,458·24 tons; or, 774,611·52 gallons of water per acre; or, 171·20 lbs. to a square foot.

The number of days on which rain fell (162) was 15 *more* than in 1905.

Greatest fall, in 24 hours, 1·04 inch, on the 28th June; the only occasion on which the amount exceeded one inch.

Greatest fall, in one month, 6·79 inches, in November.

Smallest fall, in one month, 0·78 inch, in July.

The rainfall at Ringmer, during the last five years, was as follows:

In 1902	24·37 inches	on 147 days.
" 1903	38·95 "	" 174 "
" 1904	28·56 "	" 157 "
" 1905	29·80 "	" 147 "
" 1906	34·24 "	" 162 "

Or, an average fall of 31·18 inches; on 157 days.

Analysis of Direction of Wind (at 9 a.m.).

On 2 mornings	N.
" 2 "	S.
" 28 "	E.
" 98 "	W.
" 67 "	N.E.
" 59 "	N.W.
" 31 "	S.E.
" 78 "	S.W.
Total... 365	

General Remarks.

The rainfall for the year was above the average.

The temperature was slightly higher than in 1905.

The average reading of the barometer, at 9 a.m., 0·11 inch above that in 1905. There was, however, nothing of a very exceptional character in the weather during the entire year.

Time of Observation 8 a.m.

Nearest Railway Station
Name Robertsbridge
Distance 1½ miles Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

26 JAN 1911

Kept at Selsey Bill
in the County of W. Sussex
by E. H. Allen Esq

RAIN GAUGE
Pattern Symons
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " " Sea Level .... ft.

Time of Observation ....

Nearest Railway Station
Name ....
Distance .... Direction ....

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

5 JAN 1911

Kept at Rotherhill Stedham

in the County of Sussex 2

by Dr W. A. Wills.

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground ft. 15 in.
" " " Sea Level 160 ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Elsted.
Distance 1¾ m. Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

Nearest Railway Station
Name Uckfield.
Distance 1/4 Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
10 JAN 1910

Kept at The Olives. Wadhurst

in the County of Sussex.

by Miss E. P. Luck.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 380 ft. estimated

Time of Observation 8. a.m.

Nearest Railway Station
Name Ticehurst Road
Distance 2¾ Direction South East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kept at Uplands, Wadhurst

in the County of Sussex

by M. C. Watson

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 480 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Wadhurst
Distance 1½ miles Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

10 JAN 1910

Kept at Westdean

in the County of Sussex

by C. Groom pr F. Stileman

RAIN GAUGE
Pattern
Diameter of top 8 ins.
Height of top above Ground 1 ft. — in.
" " " Sea Level 111.66 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Beswick
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

3 JAN 1910

Kept at The Manor House West Thorney

in the County of Sussex

by Herbert Padwick

RAIN GAUGE
Pattern L. Casella's Copper
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 23 ft.

Time of Observation 8.30 a.m

Nearest Railway Station
Name Emsworth
Distance 3½ Direction N. W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A1.
BRITISH RAINFALL.

9 JAN 1911

Kept at Lyford Lodge Whatlington

in the County of Sussex 6

by Miss Hilda Gripper

RAIN GAUGE
Pattern "Howards" L. Casella
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 90 ft.

Time of Observation 9.30 a.m.

Nearest Railway Station
Name Battle SE. CR
Distance 3m. Direction S.

IMPORTANT NOTE.—Rain should be measured daily at **9** a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
26 JAN 1911

WINCHELSEA
NESBIT COTTAGE
SUSSEX
1910

~~Nov.~~ Dece

Dear Sir,

In enclosing the record for November I venture to ask if you would kindly enclose me in the accompanying envelope my record for August, which I unluckily omitted to copy on to the sheet you kindly supplied fo the year's rainfall. I am sincerely sorry to give you this trouble, but without referring to it again I cannot be sure of the total year's rainfall.

I have also to explain that my guage has been three times moved this year, owing to my having two furnished houses in Winchelsea before settling here. Will the record in that case be of any use to you? I may mention that the altitude in all three houses varied only by a few feet. Perhaps you might like to have the total and enter it in italics, as I see is
